

Health Testing

The milk recording sample holds a wealth of health information for dairy herds.

CIS provide insights from milk, tissue and blood samples to help dairy farmers manage herd health with a range of tools.

The web based system YourHerd is FREE of charge for all milk recording CIS customers providing a host of information to assist you in making informed management decisions for the benefit of your herd.

CIS Health Testing includes:-

- Disease testing for Johne's, BVDag, BVDab, IBR, Lepto, Neospora, Liverfluke and Schmallenberg.
- Ketosis/Acidosis indicator for imbalance of butterfat/protein levels.
- Milk urea analysis to assist feed management.
- Protein intercept comparing production with protein levels to gauge energy status.
- SCC monitor to pinpoint ongoing or one-off problems.
- Online medicine book.

Disease testing is available on a quarterly or ad hoc basis. All other analysis is included free of charge with routine milk recording. CHeCS schemes are also available.
