

# MobileHerd

## Data on the Hoof - Collecting Herd Management Data amongst your Cows.

If you want a quick, simple and easy way to add events and view animals in your herd, then look no further.

MobileHerd is a service which has been created to allow farmers and advisors to access animal data and record information whilst out and about on the farm.

# MobileHerd as an iPhone and Android App features:-

- Secure download of the herd's information to your iPhone, iPad or Android device.
- View animal records at the touch of a button.
- Add individual animal events, as they happen.
- Links to breed societies and BCMS are available.
- Synchronise MobileHerd data with a central database.
- View day to day reports for animals which are due to calve, serve, PD or dry off.
- Internet connection is only required for synchronisation of data when entered.
- Available free for iPhone and Android on the App Store.
