

# YourHerd

## The web based 'Your Herd' management program, has enhanced the power of CIS milk-recording systems.

With tools that encourage the farmer and his advisors to view the complete picture of the herd and investigate individual cows, Your Herd allows essential management decisions to be made without the need to spend valuable time wading through information from several different sources.

Customers can login to view herd and cow performance, and if they wish can use 'Your Herd' as a complete herd management program at no extra cost.

Your Herd

cis  
cattle information service

## YourHerd Benefits:-

- 24/7 access to input events, register new births with BCMS, with breed society links, and download reports.
- Benchmark your herd and track performance within region and nationally.
- Meet legislation with linked movement book and medicine records
- Short and long term production planning tools
- View day to day action reports
- Track herd health, and monitor disease prevalence
- Access is complimentary for all CIS customers
