1.0 INTRODUCTION

MobileHerd is a free App available to all CIS and UDF milk recording herds. It allows customers to view their herds' data and record information without the need for internet access, therefore it can be used on and off farm very easily. MobileHerd is linked to the secure web based YourHerd portal with software that integrates with Breed Societies to do passport and pedigree registrations resulting in less time duplicating data. A demo herd is available on the App for customers to trial how it works.

2.0 GETTING STARTED WITH MOBILEHERD

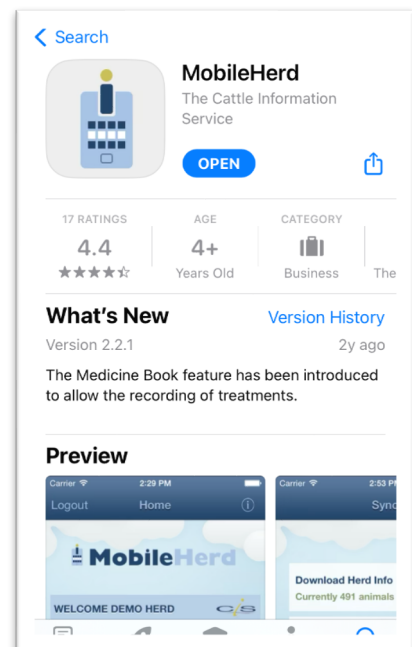

Apple Devices

Download the "MobileHerd" App for free via the App Store on Apple devices. Search for the MobileHerd App and tap to Install.

Please Note:

- *Latest versions of MobileHerd:*
 - *2.2.1 is compatible with Apple devices.*
- *Apple devices must be a model 6S or more recent.*
- *Apple devices earlier than an iPhone 6S can be used for all aspects of MobileHerd apart from the treatment section.*
- *Apple devices must be set to "24hr clock London" within Settings > General > Date and time.*
- *Apple devices must be set to "Light Mode" within Settings > Display > Brightness.*

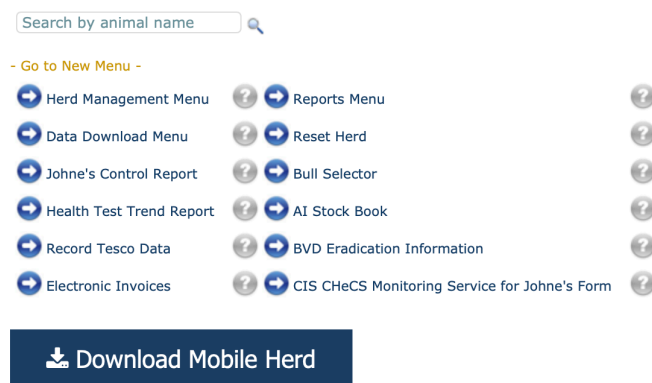

Android Devices

Download the “MobileHerd” App for free via the Google Play Store app on an Android. Search for MobileHerd. Tap to Install.

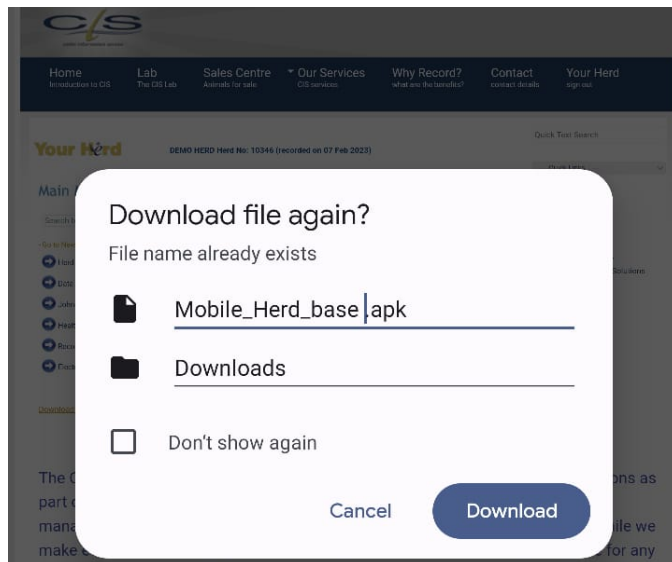

OR

Sign in to YourHerd with CIS herd number and PIN on your android phone.

Main Menu

When on the Home Page of YourHerd click the link that says “Download Mobile Herd”

Download the actual App or APK file onto your phone.

When download is complete tap on the download file to start the installation process.

The device may ask for permission to install the app. “Yes”. Give permission for the app to be installed and then click install.

Once the installation is complete MobileHerd will then be on the device.

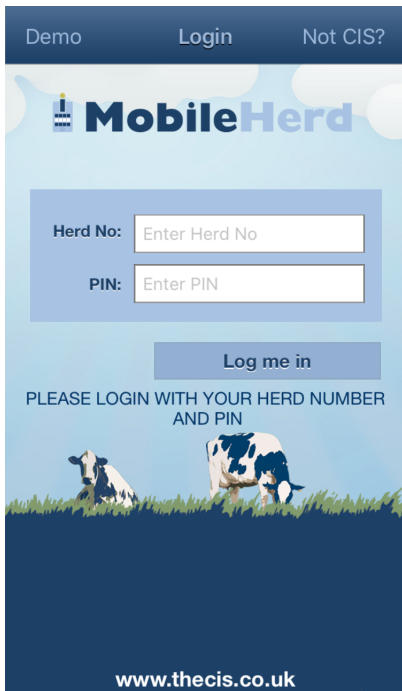

3.0 UPDATING THE APP TO ACCESS THE NEW TREATMENT PAGE

To access and use the new Treatment Page, delete any existing versions of the MobileHerd App and reinstall the new version as shown above to your iPhone, iPad or Android device.

4.0 LOGGING IN

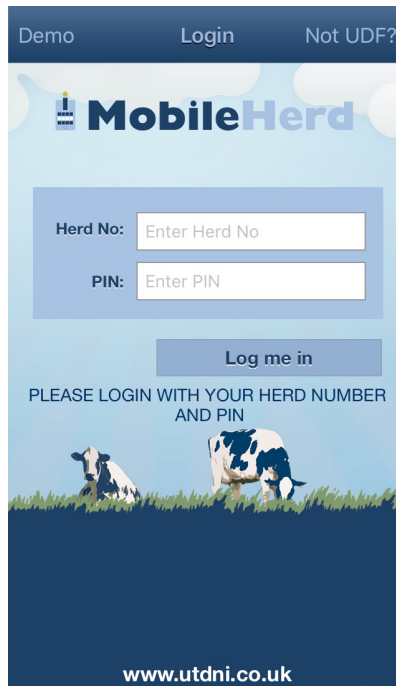

Once downloaded enter your CIS or UDF herd number and PIN to log in. If you have not yet received a pin number from CIS/UDF please contact your Area Manager or call CIS on 01923 695319.

The Demo Herd can be viewed by pressing Demo in the top left corner.

The CIS Login Page features a dark blue header with three tabs: 'Demo', 'Login', and 'Not CIS?'. Below the header is the 'MobileHerd' logo. A light blue login box contains two input fields: 'Herd No: Enter Herd No' and 'PIN: Enter PIN'. Below these fields is a 'Log me in' button. The text 'PLEASE LOGIN WITH YOUR HERD NUMBER AND PIN' is displayed below the button. At the bottom, there is an illustration of two cows in a field and the website address 'www.thecis.co.uk'.

CIS Login Page

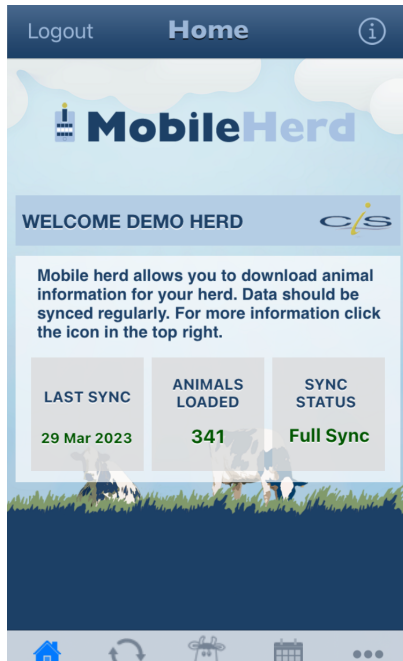

The UDF Login Page features a dark blue header with three tabs: 'Demo', 'Login', and 'Not UDF?'. Below the header is the 'MobileHerd' logo. A light blue login box contains two input fields: 'Herd No: Enter Herd No' and 'PIN: Enter PIN'. Below these fields is a 'Log me in' button. The text 'PLEASE LOGIN WITH YOUR HERD NUMBER AND PIN' is displayed below the button. At the bottom, there is an illustration of two cows in a field and the website address 'www.utdni.co.uk'.

UDF Login Page

If when downloading the App it brings you to this page, click 'Not UDF' in the top right corner.

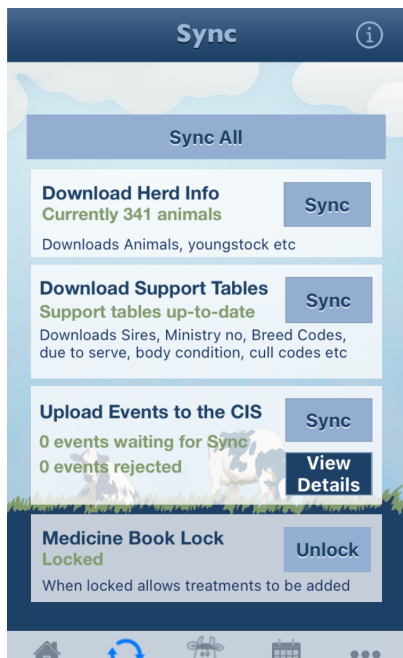

5.0 HOME PAGE

The home page provides users with the summary statistics such as the current number of animals in the App and the last sync date. Users should sync the App regularly to ensure the data is up to date. Once the data is synced users can view the data, even when offline.

From the home page select sync at the bottom of the screen.

6.0 SYNC PAGE

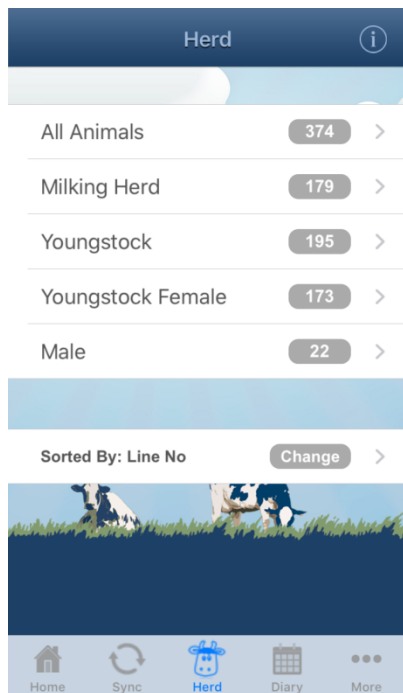

Synchronise newly added events and any medicine treatments using the “Sync All” button.

The App will now display how many animals have been found in your herd, including youngstock. MobileHerd is now ready to use.

Note: Ensure that the “Medicine Book Lock” is unlocked before synchronisation.

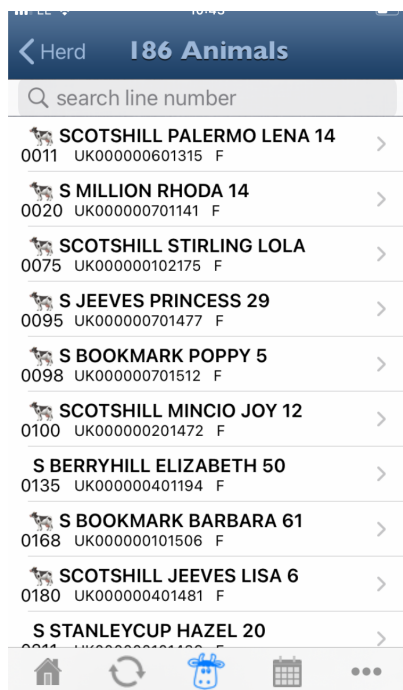

Note: Connection to the internet is needed for the above steps to download the App and synchronise the data from the CIS web-based YourHerd portal.

7.0 HERD PAGE

The herd page gives a list of options of animal groups; select whichever you want to use. Search within the group by scrolling through the list or by putting a line number in the search box located at the top of the page.

You can use the 'Sorted By' option to view your herd list in Line Number, Eartag, Animal Name or Date of Birth order.

Touch the screen to select a relevant animal, which will take you to a page with the individual animal's full details.

The SCC ? highlights the last three Somatic Cell Count results.

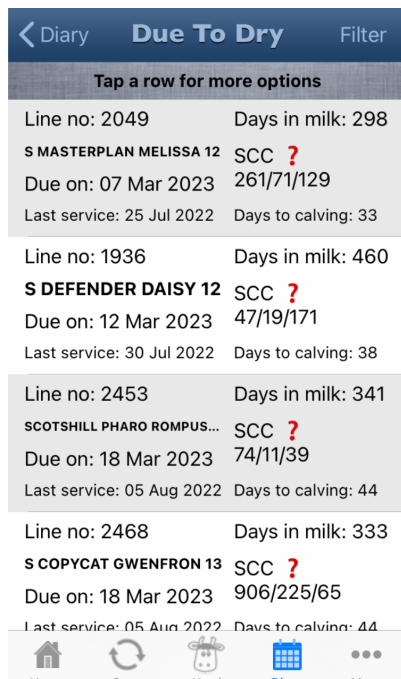

From this page, you can select Add Event at the top of the screen to add events such as PD/Heat, Left Herd, Service or Calving.

Once these events have been loaded, they will show on the My Event List which can be viewed on the Sync Page until the next sync is done and can be edited from there.

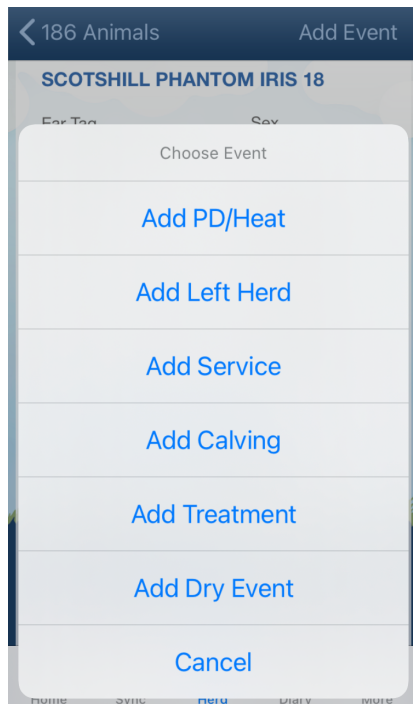

8.0 DIARY PAGE

The diary page displays a list of reports: Due to Dry, Due to Calve, To Be Served and Due To Come Bulling. Select the report you want to view.

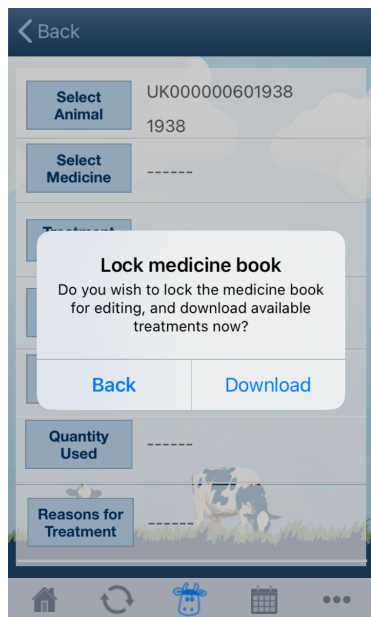

By selecting Due to Dry, for example, you will have a report of all animals due to go dry within your herd. You can use the filter at the top of the page to select which animal groups you want to display in the list i.e. Milking Herd or Youngstock.

By clicking on an animal within the report you will get the option to add events to your phone calendar.

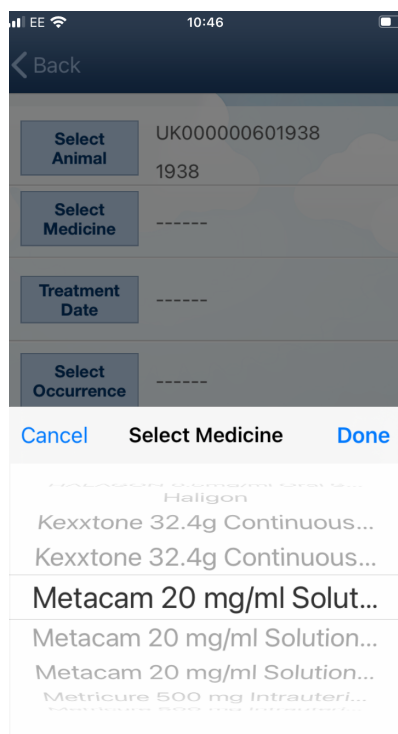

9.0 TREATMENT PAGE

The Treatment Page on the App, which links to the Medicine Book on YourHerd, enables you to record medicines and treatments whilst out with the herd. To access and use the new Treatment Page delete any existing version of the MobileHerd App and reinstall the new version to your iPhone, iPad or Android device via the App Store or Google Play.

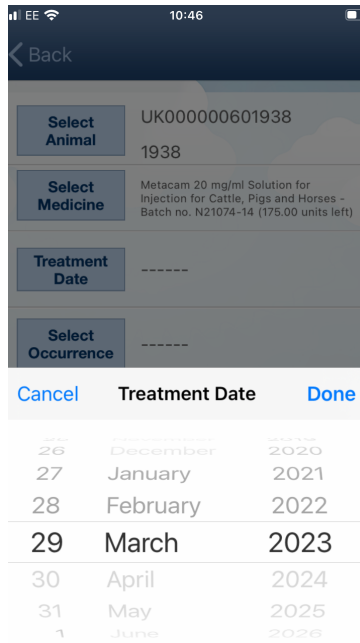

Firstly, you **must** enter all medicines and treatments onto the Medicine Book on YourHerd before using the Treatment Page on the App.

Importantly when using the Treatment Page on the App it will lock the YourHerd Medicine Book. ONLY ONE USER at a time can use the Treatment Page and whilst in use the Medicine Book on YourHerd will be locked

Select a medicine from the list. Remember that new medicines or treatments etc. **MUST** be entered into the Medicine Book on YourHerd prior to using the Treatment page on MobileHerd.

or

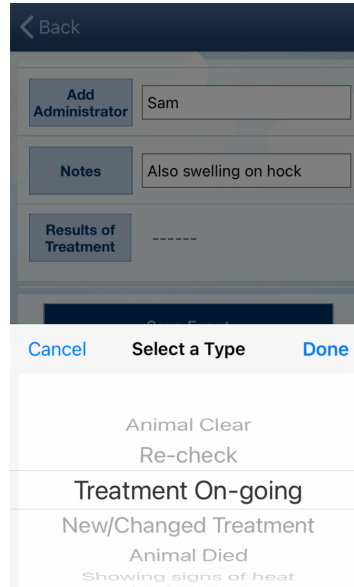

Save and add another treatment

Home Sync Herd Diary More

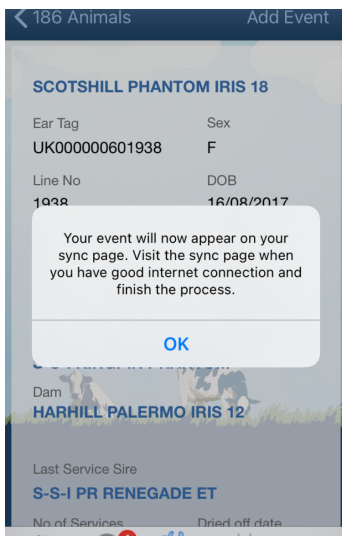

Input who administered the treatment.

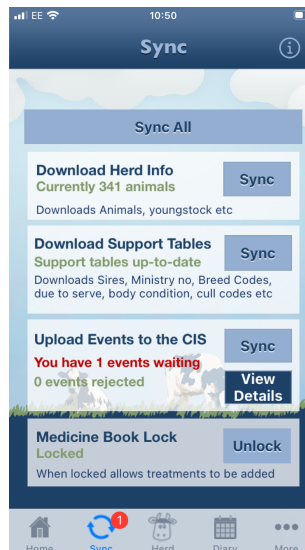

Notes can be added for reference.

Then Select a Type for the results of the treatment.

Then "Save Event" and you will get a notification to say that the event will now appear on the sync page. Remember you need good internet connection for synchronisation.

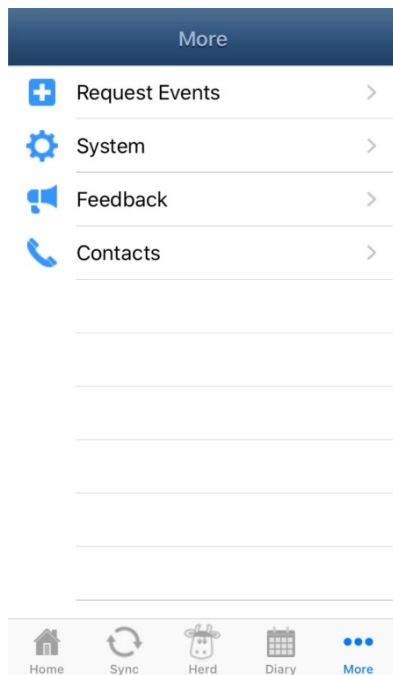

When you have good Wi-Fi go to the Sync page and synchronise, the events will be uploaded to YourHerd.

Once all events are uploaded you need to Unlock the Medicine Book Lock to allow other users to use the Medicine Book on YourHerd or another mobile device.

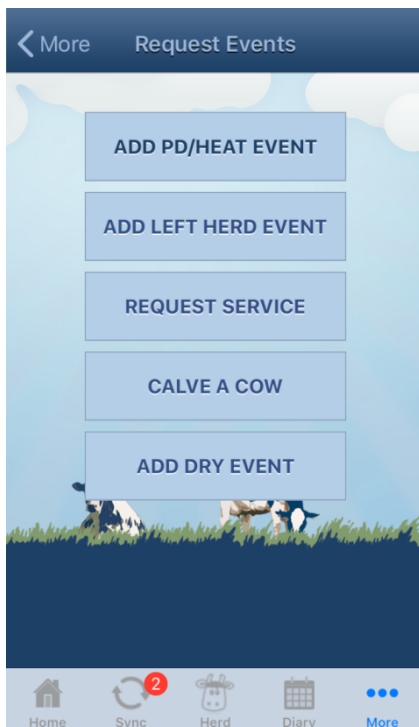

Once uploaded to YourHerd the treatments will be shown on the Treatment History page.

10.0 MORE

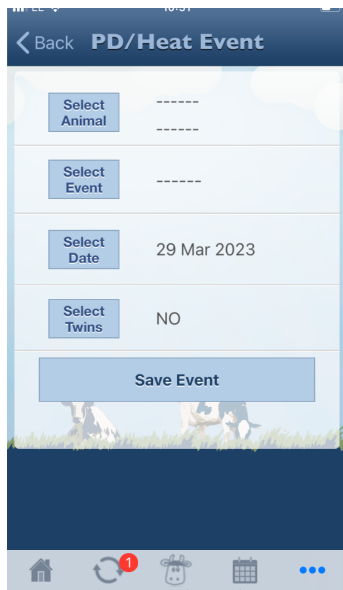

There is further information available in the More section, such as CIS contact information, an area to leave feedback and within System, you can reset information and view archived events

11.0 REQUEST EVENTS

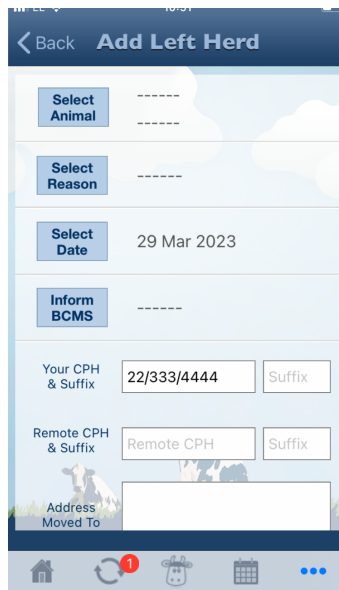

The Request Events tab gives you another quick way of entering herd events including Adding a PD/Heat Event, Left Herd Event, Calvings and Dry Events.

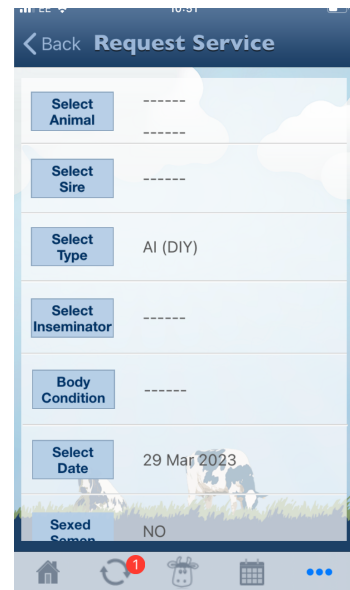

MobileHerd app screen for adding a PD/Heat Event. The screen has a blue header with a back arrow and the title 'PD/Heat Event'. Below the header are four rows of form fields: 'Select Animal' (dropdown), 'Select Event' (dropdown), 'Select Date' (text field with '29 Mar 2023'), and 'Select Twins' (text field with 'NO'). A large blue 'Save Event' button is at the bottom. The bottom navigation bar shows a red notification icon on the second tab.

Add PD/Heat Event Screen

MobileHerd app screen for adding a Left Herd Event. The screen has a blue header with a back arrow and the title 'Add Left Herd'. Below the header are five rows of form fields: 'Select Animal' (dropdown), 'Select Reason' (dropdown), 'Select Date' (text field with '29 Mar 2023'), 'Inform BCMS' (dropdown), and a section for 'Your CPH & Suffix' (text field with '22/333/4444') and 'Suffix' (text field). Below this is a section for 'Remote CPH & Suffix' (text field with 'Remote CPH') and 'Suffix' (text field). At the bottom is a section for 'Address Moved To' (text field). The bottom navigation bar shows a red notification icon on the second tab.

Add Left Herd Event Page

MobileHerd app screen for requesting a service. The screen has a blue header with a back arrow and the title 'Request Service'. Below the header are six rows of form fields: 'Select Animal' (dropdown), 'Select Sire' (dropdown), 'Select Type' (text field with 'AI (DIY)'), 'Select Inseminator' (dropdown), 'Body Condition' (dropdown), and 'Select Date' (text field with '29 Mar 2023'). At the bottom is a section for 'Sexed Semen' (text field with 'NO'). The bottom navigation bar shows a red notification icon on the second tab.

Request Service Page

MobileHerd app screen for calving a cow. The screen has a blue header with a back arrow, the title 'Dam', and a 'Next' button. Below the header is a section titled 'Calving Animal Details' with four rows of form fields: 'Select Animal' (text field with '1775' and 'UK0000000401775'), 'Calving Date' (text field with '29 Mar 2023'), 'Calving Difficulty' (text field with 'Normal Calving'), and 'Body Condition' (text field with '3'). Below this is a section for 'Red:' with 'No' and 'Yes' radio buttons. The bottom navigation bar shows a red notification icon on the second tab.

Calve a Cow Page

MobileHerd app screen for adding a dry event. The screen has a blue header with a back arrow and the title 'Request Events'. Below the header are three rows of form fields: 'Select Date' (text field with '29 Mar 2023'), 'Select Animal' (text field with 'S HAZE ELIZABETH 116' and '0000'), and 'Body Condition' (text field with '3'). A large blue 'Save Event' button is at the bottom. The bottom navigation bar shows a red notification icon on the second tab.

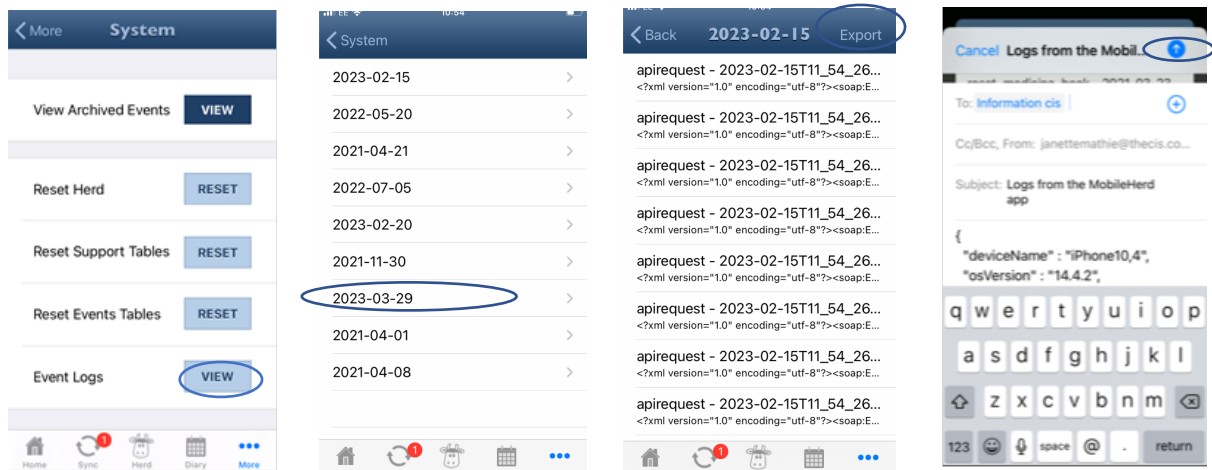

Add Dry Event Page

12.0 SYSTEM

If you experience any issues, please email an events log to info@thecis.co.uk.

The event log is found by selecting:

- “More”
- “System”
- “Event Logs” View
- Today’s Date
- “Export”
- Press the blue arrow to send

13.0 SYNCHRONISING MOBILEHERD

When information and data are added via the App out on the farm, it will be saved to MobileHerd and will need to be synchronised again online for it to be seen in ‘Your Herd’. MobileHerd will prompt you when this is required.

MobileHerd also allows you to synchronise data to your phone calendar to keep track of any events that are occurring or due.

When syncing, you may get an Error Page (i.e., trying to enter two services on the same day will cause this). You must rectify these before you will be able to complete the sync.
